

NOTAMs PROCEDURES

- 1.) Go to: <https://www.notams.faa.gov/dinsQueryWeb/>
- 2.) Scroll down to 'Geographical Radius Search'
- 3.) Type in KNDZ for ICAO and 50 for Radius
- 4.) Print NOTAMs and attach to clipboard

The screenshot shows the DINS website interface. At the top, there's a banner for the Defense Internet NOTAM Service (DINS) with logos for the Air Force, Army, Navy, and Marine Corps. Below the banner, there's a 'NOTAM Retrieval' section with a text input field and buttons for 'View NOTAMs' and 'Reset'. A 'New!' notice indicates that Graphical NOTAM is now available for NOTAM Retrieval by ICAO Identifiers for Military Airfields only.

The 'Advanced NOTAM Functions' section contains several buttons for different types of NOTAMs: Attention Notices, Presidential TFRs, FDC Notices, DAFIF/Flt Chart Notice, GPS/WAAS, North Atlantic Track, ARTCC TFRs, FDC Special Notices, Fuel NOTAMs, Pacific Tracks, Graphical TFRs, European RVSM, and MOA.

The 'Custom DINS Services' section includes buttons for DoD Procedures, FIR NOTAMs, Host Nation Service, AFCD Europe Notices, Subscription Service, and European Briefings.

The 'Geographical Radius Search' section has two forms: 'ICAO Radius Search' and 'Lat/Long Radius Search'. The 'ICAO Radius Search' form has a red arrow pointing to it with the text 'ICAO: KNDZ' and 'RADIUS: 50'. The form contains fields for 'ICAO Identifier' (KNDZ), 'Radius' (50 NM), and buttons for 'View NOTAMs' and 'Reset'.

The 'Lat/Long Radius Search' form has fields for 'Latitude', 'Longitude', and 'Radius' (20 NM), with buttons for 'View NOTAMs' and 'Reset'.

On the right side of the page, there's a sidebar with various links and resources, including 'DINS CCR Functions', 'DINS Search Utilities', 'DINS Training Aids & Publications', 'International Civil Aviation Organization', 'Iraq / Afghanistan AOR Information', 'Navy Weather Briefer', 'US Navy Flight Weather Briefer (FWB)', and 'Transitional Flight Related Information'.
